OUR LEADERS.

The men chosen to lead us to a glorious victory in Henry county this fall, are those in whom the people can and do have the strictest confidence. No Democrat need be ashamed of his standard bearers. They are all upright, honorable, intelligent, competent gentlemen, and if elected will serve the people in the interest of good local government, properly and judiciously administered.

But all of these men no doubt will be eluded and traduced by the Republican gang which infests this county, who have no further regard for honor and official position other than the spoils there are in it, and who ever stand ready to do the work of the political trickster to gain their ends. The people are not ignorant of the evil intentions of this gang; they have become thoroughly acquainted with the fellows within the past three years, and the light of truth has revealed their dark deeds. This being true, with the judicious nominations made by the Democrats, the largest majority in the history of the county should be rolled up this coming November.

JACOB H. RESH,
Candidate for Auditor, is a noble Democrat of long standing and actual worth. Is it to be supposed for a moment that he will not make as good, if not better, an auditor than George Russell? As a cool, collected and calm deliberator he stands, without official experience, head and shoulders above the present incumbent. Besides, he is a true Democrat, one who loves and reveres the principles of the good old party. He is a farmer, one of the best in the county, and is a man well abreast of the times, intelligent and honest. His election would be an honor to the county.

MICHAEL DONNELLY,
Who was accorded a renomination for Probate Judge, is acknowledged by all one of the best officials the county has ever had. He comes of a long line of Democratic ancestors in whose blood flows only the elements of pure and undiluted Democracy. During his first term of office he has served the county to the best of his ability. Every honest effort has been made to bring credit to his official acts and duties and respect for his high position. Mr. Donnelly will be restored to a second term by an increased majority.

D. C. BROWN,
For County Clerk, is a young man of sterling worth and strictest integrity. His residence among us has been marked with honor and honesty, and he stands well in the estimation of our people. His competency is unquestioned. His Democracy is unswerving and when elected will constitute an official the people will not be ashamed of. It is only a question of how big his majority will be.

E. E. DECKER,
Candidate for Sheriff, will make a worthy and faithful official. He is competent and the duties of the office will be in faithful hands. He has never held office before, has a clean record, and is a good citizen and Democrat. He is at present at the head of the Beard Electric Light Co. of Napoleon, and during his long residence in this county has always been an industrious citizen.

A. J. SAYGERS,
For County Commissioner, has made a competent official in that capacity for the past three years, and is now before the people for re-election. The office is one of the most difficult to fill in the county, and no man can fill it and please everybody. The office of county commissioner comes nearer the people than any other office in the court house building; this being a fact, no man can hold the position to the satisfaction of all. He must rely upon his own judgment to a great extent, and in doing so comes in contact with that of some one else, and in this way secures the ill will of many. Mr. Saygers has made a good commissioner and is justly entitled to a re-election. He is intelligent and conversant with the wants of the county, and the affairs of the people are conducted in an economical and prudent manner by him and his co-laborers on the board. While Mr. Saygers is an uncompromising Democrat, yet in his official position he is gentlemanly to all and tries to do his duty towards every tax-payer of the county. He should be re-elected by a large majority.

EDWARD DETMER,
Candidate for Infirmary Director, is on the ticket for re-election. He is one of the present board that have so successfully managed our Infirmary and the interests of the poor. Mr. Detmer is a successful farmer of Monroe township, an excellent citizen and a man of good judgment, and withal a good Democrat.

Democrats, such is your ticket. It is deserving of your support. See to it that it gets that support, and the evening of the 4th day of November will record a glorious victory.

E. Reynolds

D. D. DONOVAN.

WHAT IS SAID OF HIS CANDIDACY.

THE NOMINATION IS A GOOD ONE.

Hon. D. D. Donovan, present member of the legislature from Henry county, was on Tuesday nominated for congress by the democrats of the Sixth congressional district, at Defiance, on the thirteenth ballot. The nomination is a good one.—*Mansfield Shield and Banner.*

A PURE AND ABLE MAN.

Hon. D. D. Donovan, of Henry county, was nominated for congress by the Sixth district democracy at Defiance on the thirteenth ballot, Tuesday evening. He is a pure and able man and ought to defeat Brigham, the burly demagogue bully, nominated by the Republicans by a round thousand votes.—*Tiffin Advertiser.*

ALWAYS RAN AHEAD OF HIS TICKET.

The Democratic congressional convention at Defiance, Tuesday, nominated Hon. D. D. Donovan of Henry County, on the thirteenth ballot. Mr. Donovan is a member of the Legislature to which he was elected a year ago by 1350 majority, running a hundred votes ahead of the state ticket. He is said to be exceptionally strong in that part of the district where he is best known.—*Bryan Democrat.*

WILL REDEEM THE DISTRICT.

The democracy of the Sixth district in convention at Defiance, Tuesday, after a prolonged, though good natured contest, nominated Hon. D. D. Donovan, of Henry county, for congress. Mr. Donovan is a business man of integrity and pleasant address, and at present filling his second term as representative of Henry county in the legislature. He is very popular where known, and will redeem the district.—*Wauseon Expositor.*

UGHT TO AND WILL BE.

D. D. Donovan, member of the legislature from Henry county, was nominated for congress by the democrats of the Sixth district last Tuesday. He is an able man, of a high standard morally and socially and will undoubtedly make Mr. Brigham, who is the republican candidate, trying to ride into congress on the farmer's wagon, travel faster than his average pace. The democratic majority is about 1,100 and Donovan ought to be elected easily.—*Ottawa County News.*

HE IS VERY POPULAR.

The Democracy of the Sixth District in convention at Defiance Monday, after a prolonged, though good natured contest, nominated Hon. D. D. Donovan, of Henry county, for congress. Mr. Donovan is a business man of integrity and pleasant address, and at present filling his second term as representative of Henry county in the legislature. He is very popular where known, and will redeem the district.—*Wauseon Expositor.*

THE BEST NOMINATION.

Hon. D. D. Donovan, of Henry county, was yesterday nominated for congress in the Sixth district to make the race against Brigham. It was the best nomination the party could have made. Donovan is a member of the present legislature, is the chairman of the committee on benevolent institutions, a member of the finance committee and a level-headed fellow all around. His principal competitor was John W. Canary, of Wood county, and school-book ringer, Geyer, of Paulding. Donovan was nominated on the thirteenth ballot, receiving 180 votes to 77 for Geyer, and 98 for Canary.—*Toledo News.*

WILL SHOW BRIGHAM HIS HEELS!

Hon. Lawrence T. Neal, of Chillicothe, was on the floor of the house today. He was a member of the Forty-ninth congress and there were quite a number of his old colleagues remaining who greeted him warmly.

"I see by the afternoon papers that the democratic convention in the Sixth district has nominated D. D. Donovan, the member of the legislature from Henry county," said Mr. Neal. "They grow stalwart democrats up in that neck of the woods, but none of them have better timber in them than Mr. Donovan. I do not think he will find it difficult to show John H. Brigham his heels!"—*Cleveland Plain Dealer* Washington special.

BULLY FOR DENNY AND LITTLE HENRY.

It is with pleasure that we announce to our many readers the nomination of our fellow townsman, Hon. D. D. Donovan, by the Congressional Convention held at Defiance, last Tuesday, and that the honors could not have been bestowed on the party on a more deserving gentleman. One who has achieved the honor by his own persistent efforts and merit, which he has won by his honorable dealing and efficient manner in which he has discharged his duties as Representative of Henry County.

On his return home on Wednesday, the citizens turned out without regard to party and gave him a rousing reception, and kept up the jollification to a late hour.

While he differs politically from ourselves, we wish to congratulate him, and feel that his party will never have reason to regret the honor they have bestowed and always say, "Bully for Denny, and little Henry!"—*Deshler Flag.*

A TARIFF REFORMER.

At the Sixth District Democratic Congressional Convention held in the city of Defiance last Tuesday, Hon. Dennis D. Donovan, of Henry county, was nominated on the 13th ballot. The convention had a number of able candidates to select from and in the selection of Mr. Donovan it made no mistake. He is the present representative from his county in the legislature and is recognized by his colleagues as a leader and a gentleman of much ability.

He is a good debater, a tariff reformer, and an earnest worker for the cause of Democracy. He will chase Brigham over this district at a "vestibule limit-

about your Pension Claim.

ed" gait and on the evening of November 4th, the tall demagogue and political trickster of Fulton, will be side-tracked over to be repaired again. The convention was one of the most harmonious ever held in the district and the nomination of "Denny" Donovan gives universal satisfaction.—*Paulding Democrat.*

COULD NOT HAVE MADE A POOR SELECTION.

The democrats of the Sixth Congressional district held an animated convention yesterday and at a late hour last night nominated Hon. Dennis D. Donovan, of Henry County. There were a number of good candidates and the convention could hardly have made a poor selection. The proceedings were harmonious and the candidate was accorded a generous and hearty reception after the convention adjourned. Mr. Donovan is the present representative in the Legislature from Henry county. He is a leader in the general assembly, has much ability, is a good debater, a thorough tariff reformer, an indefatigable worker and he will carry the banner of democracy into every township and every section of the district. He will be more than a match for his opponent Mr. Brigham, and will be triumphantly elected in November.—*Toledo Bee.*

Catarh Can't be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarh is a blood or constitutional disease, and in order to cure it you have to take internal remedies. Hall's Catarh is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarh cure is no quick medicine. It was prescribed by one of the best physicians in this country for years, and is a real prescription. It is composed of the best tonic known, combined with the best blood purifier, acting on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarh. Send for testimonials free.

A TERRITORY IN MINIATURE.

Utah's Extensive Plan for Her Display at the World's Fair.

CHICAGO, Sept. 18.—Mr. P. H. Lannon of Salt Lake City, world's fair commissioner for Utah, has applied to the committee on site for ten acres of ground for Utah's display. He says that all of it will be utilized and that no state or territory will be able to make such an interesting or varied display as Utah. He says of it: The main building will consist of a miners' palace constructed wholly of Utah minerals and building material. Inside of the central court, 100 feet square will be a series of galleries. The floor of the court will be an exact reproduction of the surface of the territory of Utah, mountains, lakes, cities, towns, streams, railroads, and everything reproduced on a proper scale as to size and relative location. The four wings will contain agricultural, mineral, manufacturing and art exhibits. The walls of the galleries will be decorated with paintings of Utah's scenery, birdseye views of cities, historical and prominent buildings, etc. Models of the mills of her most wonderful mines will be constructed, and a prominent feature of the mining exhibit will be an ingenious contrived imitation of the interior of the great Ontario silver mine, from which \$17,000,000 dollars have been taken. Placer gold mining by hydraulic process will be produced. Free concerts and other entertainments will be given in the main galleries each afternoon and evening during alternating weeks by the various musical and other organizations of Salt Lake City while the exposition lasts. The grounds will be laid off in the highest art of landscape gardening and irrigated in such a manner as to show the system of irrigation and its superiority over all other systems of farming. All agricultural and vegetable products known to Utah, from silk and cotton to sugar beets and corn, will be cultivated. One of the most unique features will be reproduction of the great Salt Lake. For practical purposes and for the pleasure of the visitors, bath houses for actual use will be provided and visitors to the exposition will be afforded an ample opportunity to enjoy the pleasures of a bath in waters exactly the same as those in the great Salt Lake itself. This reproduced lake will be made the same in density as the great lake itself by the use of train loads of salt brought from the great Salt Lake direct.

Prescription of all Physicians

Accurately compounded at D. J. Humphrey where you can find the largest stock of toilet articles, perfumeries, cosmetics, sponges, hair, bath, shaving and tooth brushes. All the leading patent medicines can be found on my shelves. My stock of drugs and chemicals cannot be excelled in town. Also sole agent for Van Wert's Balsam for the throat and lungs, which I can recommend to all as a superior remedy for coughs, colds, asthma, bronchitis and consumption. We guarantee to cure or money refunded. Call for a trial size free. Large dollar bottle, holding one-half pint, for 50 cents. Remember the place, ap 24-ly

D. J. HUMPHREY.

Why Oil Calms the Sea.

The action of oil in calming the sea is now so generally recognized, says the *London Nautical Magazine*, that the new rules as to life-saving appliances to go into effect November 1 require that every boat of seagoing vessels and all lifeboats shall carry "one gallon of oil and a vessel of approved pattern for distributing it on the water in rough weather." The potency of oil in smoothing waves was recently explained by Lord Rayleigh before the Royal Institution in a lucid lecture. This well-known scientist's experiments demonstrate that foam or froth is caused by impurities in liquids. Thus, on shaking up a bottle containing pure water we get no appreciable foam, but taking a mixture of water with five per cent. alcohol there is much greater tendency to foam. Camphor, glue and gelatine dissolved in water greatly increases its foaming qualities and soap still more. Lord Rayleigh finds that sea water foams, not on account of its saline matter, but in consequence of the presence of something extracted by wave action from sea weeds. By simply putting his finger in water, which was moving vigorously under the influence of a plugh

Pension Claim.

camphor scrapings, the contamination of the water by the infinitesimal amount of grease sufficed to form an invisible film over it and to neutralize the foaming action produced by the dissolved camphor. The effect of oil on the waves, as several physicists have proved, is not to subdue the huge swell, but to smooth and tone down its ripples, each of which gives the wind a point d'appui, thus increasing the force of the breaking waves. "The film of oil," says Lord Rayleigh, "may be compared to an inextensible membrane floating on the surface of the water and hampering its motion." As long as the advancing tumultuous sea water is pure there is nothing to oppose its periodic contractions and extensions, but when its surface is covered with the oily membrane the most dangerous contractions and extensions are impossible. The scientific demonstration of the sea-quelling virtue of oil is worthy of note by all sailors. It is fortunate for them that Lord Rayleigh has accomplished this at a time when ocean storms, and especially tropical hurricanes, are likely soon to tax the seaman's art to the utmost in saving his craft from destruction.—*Herald.*

Oysters.

The departure of the months whose names have no "r" in them and the consequent re-appearance of the oyster in the market may well direct attention to the wide-spread and growing importance of this delicious bivalve, considered as a food staple.

This mollusk, which in Roman times was a luxury attainable only by the rich epicure, and which to this day in Italy is produced only in small quantities, has become in the United States, and is tending to become in England and France, a recognized staple of general consumption. Its incomparable digestibility when eaten raw and its susceptibility of prolonged preservation when steamed and packed in airtight cans have rendered the cultivation of this shell-fish a subject of careful study on the part of the economist and legislator. The processes of culture are in some countries defined by statute, and it is a noteworthy fact that in England the law forbidding the removal of oysters from their beds during May, June, July and August, which was repealed in 1866, was re-enacted ten years later, and is now enforced.

The statistics of the oyster are likely to surprise those unfamiliar with the part which it plays in the markets of the world. It is computed that the number of oysters (including both natives and those artificially bred) annually taken from the waters of Great Britain is 1,600,000,000. This product implies a yearly consumption of forty bivalves per head of the population. But Great Britain also imports oysters from the United States. The value of this trade, which in 1874 was only \$41,000, had risen in 1883 to \$371,000, and is now, no doubt, much greater. The outcome of the oyster fisheries of France, which ranks next among European consumers, is estimated at 680,000,000.

Then come Holland and Italy, which however, can only procure respectively 21,500,000 and 22,000,000 a year. The Italians by the way, only practice oyster culture in the Bay of Tarentum. The Ostend oyster is famous for its flavor, but the whole yield of Belgium is only 2,500,000, which could be easily disposed of by a few Paris restaurants. Oysters are particularly dear in St. Petersburg, because they must be imported, only 250,000 being procurable from Russian waters. Spain and Portugal are, also, badly off, obtaining col-

lectively only 1,800,000. The whole number of oysters annually gathered from the sea in Europe is about 2,331,000,000. Of these by far the greater part are the product of systematic culture, for the native beds have long since been practically destroyed. Scarcely more than seven per cent. of the oysters eaten in Europe pass directly from the native beds into the hands of consumers.

Very different is the oyster record of the United States. The number of these mollusks annually taken from our waters is computed at 6,550,000,000—equivalent to a yearly consumption of more than eighty-five oysters by every man, woman and child. Moreover, this colossal product are carried directly from their native beds to market. According to the tenth census, this industry employed some 53,000 persons, and its product was three times as valuable as that of cod-fishery. We may mention, finally, that, when the last census was compiled, eighty per cent. of the total yield of the United States was obtained from the waters of Chesapeake Bay.

A most valuable little book which should be in every household, has been prepared by the proprietors of Mellin's Food, entitled "The Care and Feeding of Infants." It contains advice that every mother will find of the greatest value and assistance in feeding her child. Mailed free upon application to the Doliber-Goodale Co., 41 Central Wharf, Boston, Mass.

OBITUARY.

HOOPER.—On Wednesday, Sept. 17th, 1890, Alice, little twin daughter of Martin and Rose Hooper, aged 5 years, 7 months and 27 days.

STEVENS.—In South Napoleon, Sept. 19th, 1890, Samuel C. Stevens, aged 80 yrs., 10 mo. and 21 days. He was born in Trumble Co., Va., was married to Eliza Nash April 8th, 1832. He was the father of 7 children, 4 of which died, 23 grand-children and 10 great grand children are left to mourn the loss of a devoted father. He has lived in this county 45 yrs. He was a great sufferer, but patiently bore his afflictions and died realizing in his last moments that he was at peace with God.

MILLER.—In Harrison Tp., Henry Co., O., Sept. 18th, '90, of typhoid fever, Harriette, wife of Adam Miller, aged about 60 years. Some 25 years ago with her husband they came to Henry county, O., seeking for a home; they located in Harrison Tp., and by toil and economy the timber land was transformed into one of the fine farms of the township, as a neighbor she was kind and obliging, as a wife and mother she made home happy and pleasant. In early life she gave her heart to Christ and her hand to the Evangelical Church, of which she remained a faithful member until the Master called and found her ready to go, expressing her willingness to depart and be with Christ. A husband and three children mourns the loss of one so dear to their hearts, but their loss is her eternal gain.

On Sabbath, the 21st., a very large concourse of people gathered at the late home of the departed and followed to the Evangelical Church where funeral services were held by Rev. J. W. Myers assisted by Rev. Hiddle, of Belmore, O., after which her remains were deposited in the cemetery near by to await the resurrection morn.

A mammoth loaf of bread two feet square and one foot thick, weighing 50 pounds, was recently received at the White House. It came as a gift to the President from a yeast manufacturer and a baker.

Miles' Nerve & Liver Pill.

An important discovery. They act on the liver, stomach and bowels through the nerves. A new principle. They speedily cure biliousness, bad taste, torpid liver, piles and constipation. Splendid for men, women and children. Smallest, mildest and surest. 30 doses for 25 cents. Samples free at I. Leist. Nov 7-89 ly

Highest of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 1889.

Royal Baking Powder

ABSOLUTELY PURE

GRAPE CULTURE
Is fast becoming a leading business of this country, and that together with wine making requires years of practice. Mr. A. Speer, of New Jersey, one of the largest producers in the East, commenced years ago in a small way to make wine from currants, blackberries and other fruits. He soon turned his attention to grape raising and planted large vineyards of the Portugal vines from which his famous Port Grape Wine and Unfermented Grape Juice is made, which chemists and physicians say rivals the world for its beneficial effects on weakly and aged persons.

BORN IN A GRAVE.

Birth Given to a Child By a Woman After Burial.
VIENNA, September 19.—The body of a woman named Goeda was exhumed at Szeged, to-day for the purpose of autopsy. When the coffin was opened it was found that the woman was buried alive and that she had given birth to a child in the coffin.

Hibbard's Rheumatic and Liver Pills.
These pills are scientifically compounded uniform in action. No grating pain so commonly following the use of pills. They are adapted to both adults and children with perfect safety. We guarantee they have no equal in the cure of sick headache, constipation, dyspepsia, biliousness, and, as an appetizer, they excel any other preparation.

They are in bathing. He—"Were you ever caught by the undertow?" She (with a reminiscent little
